

GGG Acrylic Replacement Gel Pads

GGG® Acrylic Replacement Gel Pads are the only true alternative. Previously offered acrylic pads are difficult to handle and their application often causes air

GGG Trouble Free SensorTack® Ready Silicone Replacement Gel Pads

These 'ready-to-go' GGG® Silicone Replacement Gel Pads are the only true alternative. Previously offered acrylic pads are difficult to handle and their application often causes air bubbles resulting in performance issues and sensor failures. Our SensorTack® Ready Pads are made of silicone, just like the OE parts. Their surface is non-adhesive and can be applied easily unlike any acrylic foam pad.

GGG SensorTack® Refill Gel

Our SensorTack® refill gel is a revolutionary product designed to replace the damaged gel and thus re-attach the sensor to the windshield.

In just a few minutes the old sensor can be refilled with SensorTack® gel and then re-attached to the vehicle windshield.
